

Choosing a Smartphone

Amy Cisler, OTR/L
Kristine Osmond, OTR/L

acisler@uw.edu
kho2@uw.edu

Learning Objectives

- Participants will have an understanding of the main considerations when deciding on which smartphone to purchase.
- Participants will gain knowledge of where to obtain additional information such as comparisons and informational tools.
- Participants will gain knowledge on a variety of computer access systems for people with limited mobility.
- Participants will gain a better understanding of funding resources available pertaining to obtaining assistive technology.

What Phone Should I Get?

- Ask yourself, what do I want to be able to do?
- How is my arm and hand function?
- Who is my carrier?
 - Am I willing to switch carriers to get the phone I want?
- Should I wait for a new version to come out?

Resources

- Go to stores
 - Microsoft and Apple
 - Your carrier's store (ie. Verizon, T-mobile, etc...)
- Talk to people who have the phone you want
- GARI comparison tool
- C net website
- Consumer reports website
- Christopher Reeves Website
- Search you tube videos

GARI-comparison tool

<http://www.accesswireless.org/Home.aspx>

- **Goal: Wireless For All**
 - Website designed to help people with disabilities and their families find a cell phone and service
 - Designed to be your “first stop” to learn about the ever-changing world of cell phones and wireless services, and discover those that meet your specific needs.

Which phone should you buy?

An embarrassment of mobile phone riches makes this a terrific — and confusing — time to buy. We'll help you figure out where to start depending on what you want.

by Jessica Dolcourt and Brian Bennett | September 13, 2012 3:31 PM PDT

Cell phone buying guide

The most important things to know when shopping for a cell phone.

by Brian Bennett | October 5, 2012 11:15 AM PDT

Follow

Cell phones have become the most crucial personal technology purchase you can make. Not only are these devices full-fledged miniature computers in their own right, they're getting smarter with each product generation. If you're looking for a new handset right now, start with the [Samsung Galaxy S3](#) or the [iPhone 5](#). The Galaxy S3 offers all the power you'd expect from a high-end Android device in a gorgeous package. The iPhone 5, meanwhile, continues to set a smartphone standard, and it's the best iPhone you can buy. If you're an Android user who's always on the go and far from power outlets, the [Motorola Droid Razr Maxx HD](#) is the longest-lasting handset we've ever used plus flaunts a distinctive design. For more top cell picks, check out [CNET's list of our favorite phones](#).

Still undecided or need a little more guidance? Well, if that's you, then read on for CNET's expert [advice on how to buy the best cell phone for you](#).

RAM Mounting Solutions for all Cell and Smartphones

No matter where you go, you probably take your phone with you. And did you know RAM has mounts for all cell phone and smartphones? Simple to use and install, kits are available for boats, cars, motorcycles, and more. These durable and sleek looking mounts are universal in application, built in AMERICA, and are backed by a LIFETIME WARRANTY. If it is not in your pocket, it should be in a RAM Mount.

Phone Mount Wizard: How to Build Your Phone Mount

[Step 1: Select Device] *Required

The resulting cradle or adapter will attach to you're the double socket arm; this chosen in Step 2.

[Step 2: Finish & Select Arm Length] *Required

Select either black or chrome finish. Select from a short, medium or long double socket arm.

[Step 3: Select Base] *Required

The base attaches directly to the double socket arm; this chosen in Step 2.

[Accessories] *Optional

Add a locking knob to secure mount, big screen magnifier or quick release adapter.

Leading Smartphones

- **Apple**
 - Iphone 5
- **Samsung**
 - Galaxy S3
 - Galaxy S4
- **HTC - windows**
 - One

Samsung galaxy 3

Samsung galaxy 4

• Pros

- Multiple carriers
- Eye gaze stand by – disables screen time out when looking at screen
- Voice command answer/end calls
- Text by voice – S-voice

• Cons

- Accuracy
- Support
- Wake up
- Mouthstick/stylus needed
- Less durable then other brands

• Pros

- Multiple carriers
- Text by voice – S-voice
- IR blaster – can control TV
- Swipe to answer phone – gesture, no touch needed
- Eye movements to pause video
- 5” screen

• Cons

- Dimmer screen then competitors
- Lots of features = can be confusing and longer to learn to use
- Price
- Less durable then other brands

Iphone 5

- Apple Phone
- **Pros**
 - Voice commands & voice to text – virtual assistant (Siri)
 - Multiple carriers
 - Light weight
 - User friendly – simpler set up/options
- **Cons**
 - Sprint and Verizon models can't use voice and data simultaneously
 - Smaller screen size – 4”

HTC One

- Android Phone
- **Pros**
 - Large, 4.7” screen
 - 2 speakers for improved speaker phone use
 - IR blaster for TV control
- **Cons**
 - Not available on Verizon
 - IR blaster needs HTC sense TV app & HTC TV software

Nokia Lumia 920

- Windows phone
- **Pros**
 - Highly sensitive screen – can use with a glove or finger nail
 - Voice to text
 - Large screen: 5.1”
 - Wireless charging
- **Cons**
 - Heavy & with slippery finish = harder to hold
 - Not good for voice dictation*
 - Small side home key

BlackBerry Q10

- **Pros**
 - large keyboard buttons
- **Cons**
 - small screen
 - Large learning curve
 - Poor app selection
 - Physical keyboard
 - Need to press button to activate voice command

Galaxy Note 2

- **Pros**
 - Combines tablet & phone – comes with stylus
 - Large screen – 5.5”
 - S-voice
 - Multiple customizable options
- **Cons**
 - Hiccups in stylus & apps
 - High price
 - Highly reflective screen
 - Lots of options– complex

TABLETS

- Large Screen size
- Blue tooth compatibility
- Screen Standby – Home key button
- Voice Access?
- Making calls?
 - Skype, Face Time, Talkatone*
- USB access?
 - Surface Pro

Apps

Geared towards hands free driving

- **Dragon Dictate**

- Optimized for iphones (free)
- Hands free typing, but requires some touch/tap for screen access

- **Flex T9**

- Android (\$4.99)
- offers multimodal keyboard access to input information into the phone – choose to speak, trace, tap, or write

- **Vlingo**

- Ability to send and respond to messages, make calls and get directions using only voice commands

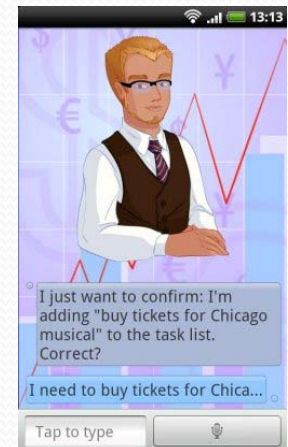

- **Sonalight Text by Voice**

- Android & HTC
- Call and text by voice – allows other apps to run in the back ground
- Wakes up the phone from stand by mode

More Apps...

- **Dragon Go!**
 - Iphone & android
 - Searches websites, but requires some touch/tap for screen access
- **Medlert911**
 - Can set up single emergency button to notify selected family/friends/doctors to be call notified while you call 911.
 - Optimized for iphone (free download)
- **Speak to it (*personal assistant*)**
 - Android & Windows (\$20/year, free download)
 - Can voice enable apps and perform speech to text
- OTs with Apps blog: <http://otswithapps.com>

Bluetooth

Geared towards hands free driving

- **Things to consider:**

- “Wake up” – button size or voice only?
- What do you want to be able to do?
- What design works best for you?
 - Head set vs. ear piece vs. speaker phone
- Multipoint pairing – allows to connect to multiple devices
- Voice control capability will be limited by the built in voice control on your phone
- Does it have it’s own voice dialing system?

Blue Tooth

- **BlueAnt S4 (\$99)**

- Allows you to launch voice access totally hand free
- Place/receive calls & speech to text
- “What can I say?” feature
- Only allows one command at a time.
- Does not have it’s own voice dialer, so relies on the phone

- **Saje**

- **EasyBlue (\$299)**

- Switch Enabled
- Does not pair well with all phones

- **Saje OfficeMate (\$499)**

- Allows you to switch between your cellphone and computer

- **Saje Zoomate**

- A switch activated speaker phone

Computer Access

Computer Access

- Voice
 - Dragon Naturally Speaking
 - Windows Speech Recognition
- Adaptive mice
 - Hand operated
 - Mouth operated
 - Mouse emulators
- Combination

Voice Access

- **Windows**

- <http://www.microsoft.com/enable/products/windowsvista/speech.aspx>
- Demo, tutorials
- Windows 7, 8, Vista
